

Use of the UK NEQAS for Immunohistochemistry & Fish On-Line EQA Data Entry Facility

Once a new distributions have been generated an email notification will be automatically sent to all registered participants.

The website for data entry is - <http://www.ukneqasicc.org.uk>

System requirements:

- To view the website we recommend the use of Microsoft Internet Explorer version 5 / Netscape version 6 or above.
- The viewing of reports will require the use of Adobe Acrobat Reader version 4 or above.

Section One: Logging On

Upon opening <http://www.ukneqasicc.org.uk> you will be required to click on the 'Participant log in button' and enter your log in details. These will be sent to the email address you supplied on registration for the web-service. The login details consist of

Lab Number (this is the laboratory participation code that appears on all documents issued to yourself from this centre) eg: 5,67,861,etc.

Identity (this is a 4 digit random number generated by this centre and unique to individual members of staff at your centre) eg: 1234

Password (this is an alphanumeric series of at least six characters that is unique to individual members of staff at your centre) eg: abc98d

Following the entry of the appropriate data please select the 'log in' button.

Please note:

The generation of identities and passwords is done using the person (lab manager, head of department etc) who is actually registered for the scheme. Logins, if required can also be assigned on an individual basis to allow for a higher level of security in cases where staff members move to other centres. Please let us know if this is required

Disclosure of your login identity and password to non staff members is not recommended and UKNEQAS for Immunocytochemistry and FISH will bear no responsibility for any misuse of the system where this has happened.
